

Response5

THE #1
NEUROLOGICAL TOOL
THAT'S EASY TO
LEARN AND
GAURANTEED TO
CHANGE THE WAY
YOU LOVE YOUR
DOG!

THE WAY YOU LOOK AT HEALTH CARE IS ABOUT TO CHANGE!

THE CONFIDENCE BEHIND RESPONSE5

With over a decade of study, experience and proven results, Response5 has long since left my own hands and now sits in the hands of people in 31 different countries!

I became 100% confident that I was getting proven results within my own Clinic with issues such as :

- Arthritis
- Spinal Cord injury - from paralysis to walking in three weeks (yes I was shocked!)
- **Degenerative Myelopathy** (elated to find a solution!)
- Hip Dysplasia
- Spinal stroke...to name a few.

**That's when I thought, "This is WAY too incredible not to share!"
So I did!**

Response5 became part of my teaching through the Canine Bowen Institute.

It became a local class for Families within my community,

And it made its online debut in 2016 after hundreds of world wide requests.

SO WHAT THE HECK IS RESPONSE5 ?

Response5 is Neurological Restoration!

Now you're thinking, "What the heck is Neurological Restoration?!"

Allow me to clarify with **three simply points**:

#1 Neurological means your dog is being treated from the nervous system out! Using this science based way of connecting with the central nervous system your dog not only improves, but improves quickly.

#2 Approaching all mobility issues via a direct communication with the central nervous system allows the brain and the nervous system to reconnect and allow the pathways to reset and return to proper function.

#3 Here's the best part!...this is a gentle, non-invasive therapy that requires nothing more than your hands to apply!

I promise you, you'll be on your way to restoring your dog's mobility within a day of beginning Response5.

Debi reflects on Senior dogs...

There is no question in my mind that Response5 will be used when any dog that is 10 years or older comes through my clinic doors!

I have a very large "box of tools" to choose from, each of them has a place and a purpose, yet the 5 simple steps of Response5 is by far my most used formula for Senior Dogs.

I can count on Response5 to:

Start the healing process, no matter what condition the dog is dealing with.

To be powerful enough without overwhelming the body's systems.

I can count on it without hesitation.

...and it has never let me down!

Response5 has a unique process of healing, especially with Seniors, beginning with a new found "spark" for life.

Love that about Response5!

Veterinarians have little to no solutions for neurological issues!

Your Physician as well as your Animals
Veterinarian live, breath and are governed by the
same teachings:

Diagnostics - Medication - Surgery.

No fault of their own, its just the way the medical
system is!

When diagnostics leads to a neurological
diagnosis they have two choices : Medication or
Surgery.

That's it my friends!...that's it!

So what do we do next?...we panic, we cry, our
heart breaks and then we begin to search...

THE SEARCH IS OVER

Response5 is designed with **three** fundamental elements in mind:

#1- To give **YOU** the tools to help restore your dog's mobility health throughout a lifetime.

This is EMPOWERING!

#2- No matter what mobility issue arises, the same 5 steps are used.

This is the coolest feature of Response5 - Super easy!

#3- You become an active part of your dog's health care.

That's what you're looking for right?

Where ever you go with your dog you now have the built in solution (in your hands) to create physical change!

Note: Response5 is all about creating CHANGE not providing temporary RELIEF.

Response5 is the World Leader

for placing Neurological support into the hands of the non-medical field.

Our common beliefs (Yours and Mine) lend themselves to a new mindset of our role as Animal Care-givers:

#1 - We have a high respect for the animals in our care.

#2- We're hyper vigilant in tending to their needs.

#3 - We're no longer satisfied with the limitations of Veterinarians.

#4 - We want to ensure that our animals have instant access to quality care.

#5 - We love to share our knowledge and skill sets to help other animals in need!

You've
got
this!
(for a
lifetime)

Unlike any other item, service, test, medication, food...that you purchase for your dog, Response5 is an easily learned skill that never needs replacing.

For the price of one average Vet visit (or less) you'll hone a skill that has a lifetime use for an endless list of conditions!

Warning:
It's highly addicting!

Once you've achieved results with your own dog you'll be searching for other animals to help!

...and that couldn't make me happier!

Bob and Louise ~ Kentucky

We're urging anyone to add this skill to your life! Out of desperation to help our aging dog with **Degenerative Myelopathy**, I signed on to Response5. Within 3 weeks my wife and I were seeing noted differences. Better stability, less hesitation walking on the hardwood floors and a definite increase in energy. Debi's generous support was incredible!

Mary and 12 year old Cinnamon

A definite increase in energy! Less stiffness and a much calmer demeanour.

The 5 steps of Response5 are life-changing and easy to execute!

A nice blend of reading/pictures/video's.

Debi was very easily available and very good at answering any queries along the way.

Maureen from Pennsylvania

Discovering Response5 was the answer to a desperate prayer for a miracle. Learning and using Response5 has been an incredible journey from despair to joy and wonder. My passion has always been animals, but I never dreamed that I would be involved in restoring their health. When my 8 year old German Shepherd was **diagnosed with DM**, I wanted something that would work and not be a burden to him or our family. This therapy has restored his mobility and vitality!

The Response5 online course is a journey that will reward you with the most effective solution to your dog's mobility problems.

Surpasses any expectation you've ever had with any online course!
